

Methodology

The Kansas Bureau of Investigation (KBI) compiled the following 2006¹ statistical crime report based on data submitted by local and state law enforcement agencies prior to 4/30/2007.

The data represents the most accurate information available, reflecting crime as reported by law enforcement agencies through the Kansas Incident Based Reporting System (KIBRS).

This system enables crime information from standard offense and arrest reports to be reported by the responsible law enforcement agencies. This report does not represent all criminal incidents committed throughout the State of Kansas, as it is dependent on victims reporting crimes to law enforcement agencies and on these agencies submitting incident reports to the KBI. Only reports that were submitted to the KBI were calculated for this report.

Data are gathered by one of three ways:

1. **Manual.** Reports are mailed from law enforcement agency to the KBI and the data is entered manually by KBI staff into the KIBRS system. These reports must pass a variety of edits in order to be accepted by the system.
2. **Electronic.** Agencies that have passed a certification process may submit their reports directly into the system through an electronic gateway. These reports must also pass a series of edits in order to be accepted by the system.
3. **Direct.** Direct reporting, more commonly called summary reporting, involves an agency merely providing the KBI with a count for each crime. This form of reporting is dependent on the agency making proper classification of offenses and does not provide any additional information regarding a case. Direct reporting data was collected on a quarterly basis for 2006.

The following factors should be considered when viewing this data:

1. Beginning with 2005 data, this report distinguishes between agencies who have sent no data and those who sent incomplete data. If an agency does not submit offense and arrest reports or a zero report, they are listed as not having submitted data. If an agency is missing data for several months or if a significant number of reports contain uncorrected errors, it is listed as did not submit complete data.
2. Beginning with 2006 data, this report notes agencies whose number of reports submitted differs from previous years by more than 20% as questionable data. Each agency is given the opportunity to review the data and either confirm the difference as accurate or make the necessary corrections before being flagged as questionable. The numbers for questionable agencies are included in this report but the user should view these numbers with caution.
3. In the event where an individual is arrested on more than one offense, the more heinous offense is typically counted.
4. Since not all crimes are solved at the time they are committed, arrests may be for an incident that happened in a previous year.
5. The FBI defines an arrest as, “all persons processed by arrest, citation, or summons”. This should include; persons arrested and released without formal charges being placed against them, and juveniles taken into custody but merely warned and released to parents.
6. Burglary of a motor vehicle is counted as a theft not a burglary, per FBI guidelines.
7. The following page of this report contains 2005 and 2006 comparative data. Columns listed as Juvenile consist of Summary and NIBRS agencies. NIBRS columns reference only those agencies submitting manually or electronically to the KBI. These comparisons consist of all data submitted including agencies submitting incomplete data.

The final responsibility for data submissions rests with the individual law enforcement agency. Although the KBI makes every effort through its editing procedures, training practices, and correspondence to ensure the validity of the data it receives, the accuracy of the statistics depends primarily on the adherence of each contributor to the established standards of reporting.

Juvenile Arrests 2005-2006 Comparison

Offense	Juvenile Arrests 05	Juvenile Arrests 06		NIBRS Arrests 05	NIBRS Arrests 06

Reported Juvenile Arrests by Agency 2006

NOTES:									
1) Data is as of 4/30/2007 from reports that have been submitted to the KBI and is counted by UCR standards.									
2) Data is questionable since over 60% of arrest reports submitted by agency are for group B offenses. This is often a result of county agencies reporting arrests for local agencies.									
3) Agency did not report sufficient data for accurate portrayal of these crimes. This may be from missing data or having significant number of uncorrected errors.									
4) Agency did not submit either offense and arrest reports or zero reports for the entire year.									
5) Agency reported using summary data for 2006									
6) Data is questionable since the number of arrest reports per incident is less than 15 percent									
7) Agency has confirmed data out of the norm as accurate.									
8) Data is questionable due to a change of over 20% from previous years. Agency did not respond confirming the data as accurate or submit the missing reports									
9) Incomplete data was submitted due to on-going technical issues beyond their control.									
10) Agency reported having no crime for the entire year but there were incidents within their jurisdiction reported by the county sheriff's office.
