

Course 1139

Enteral Conscious Sedation for Dental Auxiliary

Brett Ferguson, DDS

The course content will be similar to the dentists' course; but will be much more limited with emphasis on the auxiliary's functions related to those subjects. Patient monitoring will receive significant coverage as will the assistant's role in emergencies and the hands-on airway/ventilation techniques. Lastly the new Rules require that the auxiliary also successfully complete a similar, but far more basic exam

Location: UMKC School of Dentistry

Dates: January 27-28, 2012
