

Pandemic Flu Pre-Event PSA – 3 – 30 sec - Final

Sec. Bremby: Hello -- I'm Rod Bremby, Secretary of the Kansas Department of Health and Environment.

Gen. Bunting: And I'm Kansas Adjutant General Tod Bunting.

Sec. Bremby: In a pandemic flu, more people will get sick than during a normal flu season. The impact on society could be great. Reduce your chances of getting and spreading any flu virus by washing your hands, covering your cough, and staying home when sick.

Gen. Bunting: Before a pandemic arrives, have emergency supplies at home for your family, such as bottled water, food and medications to last a few days. For more information, visit pandemicflu.gov.

Announcer: Paid for with taxes or public funds.
