

## **Pandemic Flu Pre-Event PSA – 2**

**Sec. Bremby:** Hello -- I'm Rod Bremby, Secretary of the Kansas Department of Health and Environment.

**Gen. Bunting:** And I'm Kansas Adjutant General Tod Bunting.

**Sec. Bremby:** We must all prepare for the possibility of pandemic flu. Unlike a regular flu season, a pandemic is expected to be worldwide, more severe, and impact much of society as we know it. But you can reduce your chances of getting and spreading any flu virus by washing your hands, covering your cough, and staying home when sick.

**Gen. Bunting:** Before a pandemic occurs, it's also critical to have emergency supplies at home for each family member. These include bottled water, food and medication to last a few days. This planning will also prepare you for other emergencies. Have a family plan outlining who will pick up the kids from school and where the family will meet if going home is not an option. Planning ahead can save your life.

**Sec. Bremby:** For more information on pandemic flu, go to [pandemicflu.gov](http://pandemicflu.gov).

**Gen Bunting:** And to learn more about preparing an emergency kit, visit [ksready.gov](http://ksready.gov).

**Announcer:** Paid for with taxes or public funds.
